

Prepared by Kurt Van Speybroeck

FEMA Region 6 Weather Threat Briefing

Friday, October 5, 2018

Disclaimer: The purpose of this briefing is to provide a <u>Regional</u> weather threat assessment and is meant as a general overview. County/Parish decision makers should consult their local NWS forecast offices for the latest detailed, local weather information.

To find your local NWS forecast office, go to <u>www.weather.gov/srh</u>.

Summary of the Upcoming Week

Friday - Saturday

• Slight risk area for severe thunderstorms and heavy rain across W OK into the TX Panhandle.

Sunday - Tuesday

- Slight risk area for severe thunderstorms with heavy rain across E NM/W TX into OK.
- Moderate risk area for excessive rainfall across NW TX/SW OK.

River Flood Status

Moderate flooding continues on the Nueces River.

Tropical Outlook

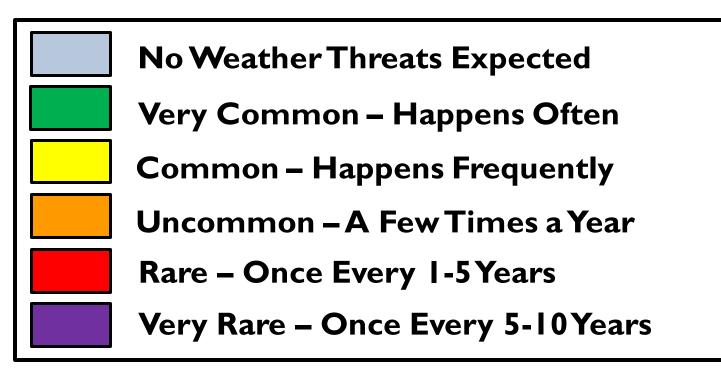

- A broad area of low pressure near Honduras could have some slow development into early next week while it drifts across the southern Gulf of Mexico.
 - Formation chance through 48 hours...low...near 30%
 - Formation chance through 5 days...medium...60%

FEMA Region 6 Threat Matrix

Oct 5, 2018 - Oct 9, 2018

DAY / THREAT	FRI	SAT	SUN	MON	TUE
Severe Storms	W OK TX Panhandle	S OK WTX/SE NM	WTX E NM		
Heavy Rain /	W OK		W OK/NW TX	ОК	ОК
Flash Flooding			OK/WTX	NTX	NTX
Fire Weather					
Tropical Weather					
River Flooding	Nueces River (STX)	Nueces River (STX)	Nueces River (STX)	Nueces River (STX)	Nueces River (STX)

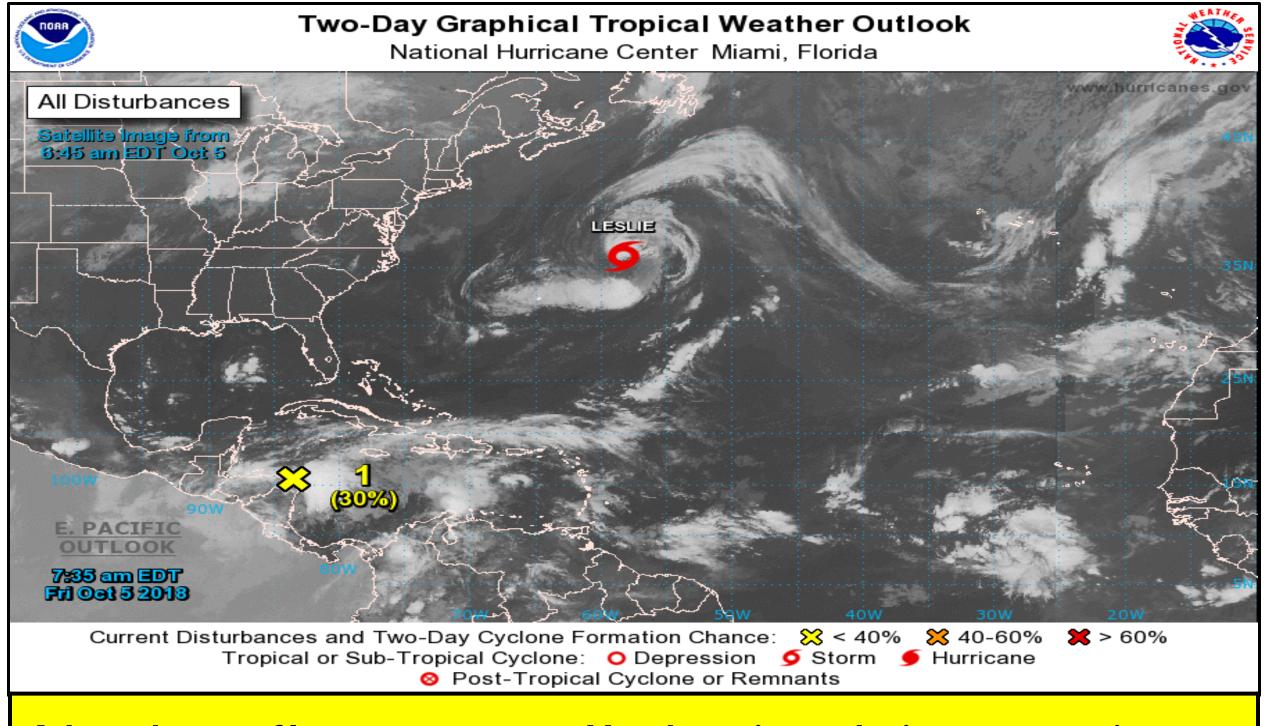

*Threat levels are based on FEMA Region 6 criteria.

State or local threat level criteria may differ.*

For more details on the colors in the threat matrix refer to the last slide in this briefing.

Tropical Weather Outlook — Atlantic/Gulf

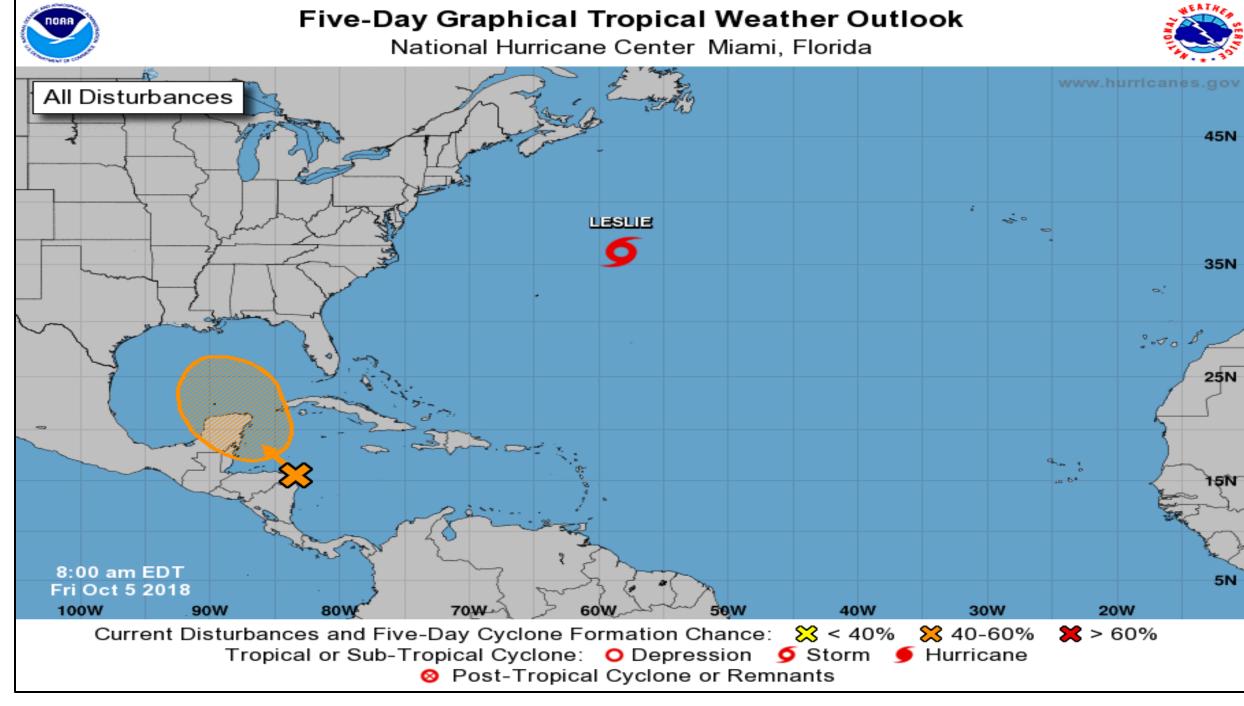

A broad area of low pressure near Honduras is producing an extensive area of disorganized clouds and thunderstorms.

Environmental conditions could become favorable early next week, allowing for some slow development as the system

Moves northwest into the southern Gulf of Mexico.

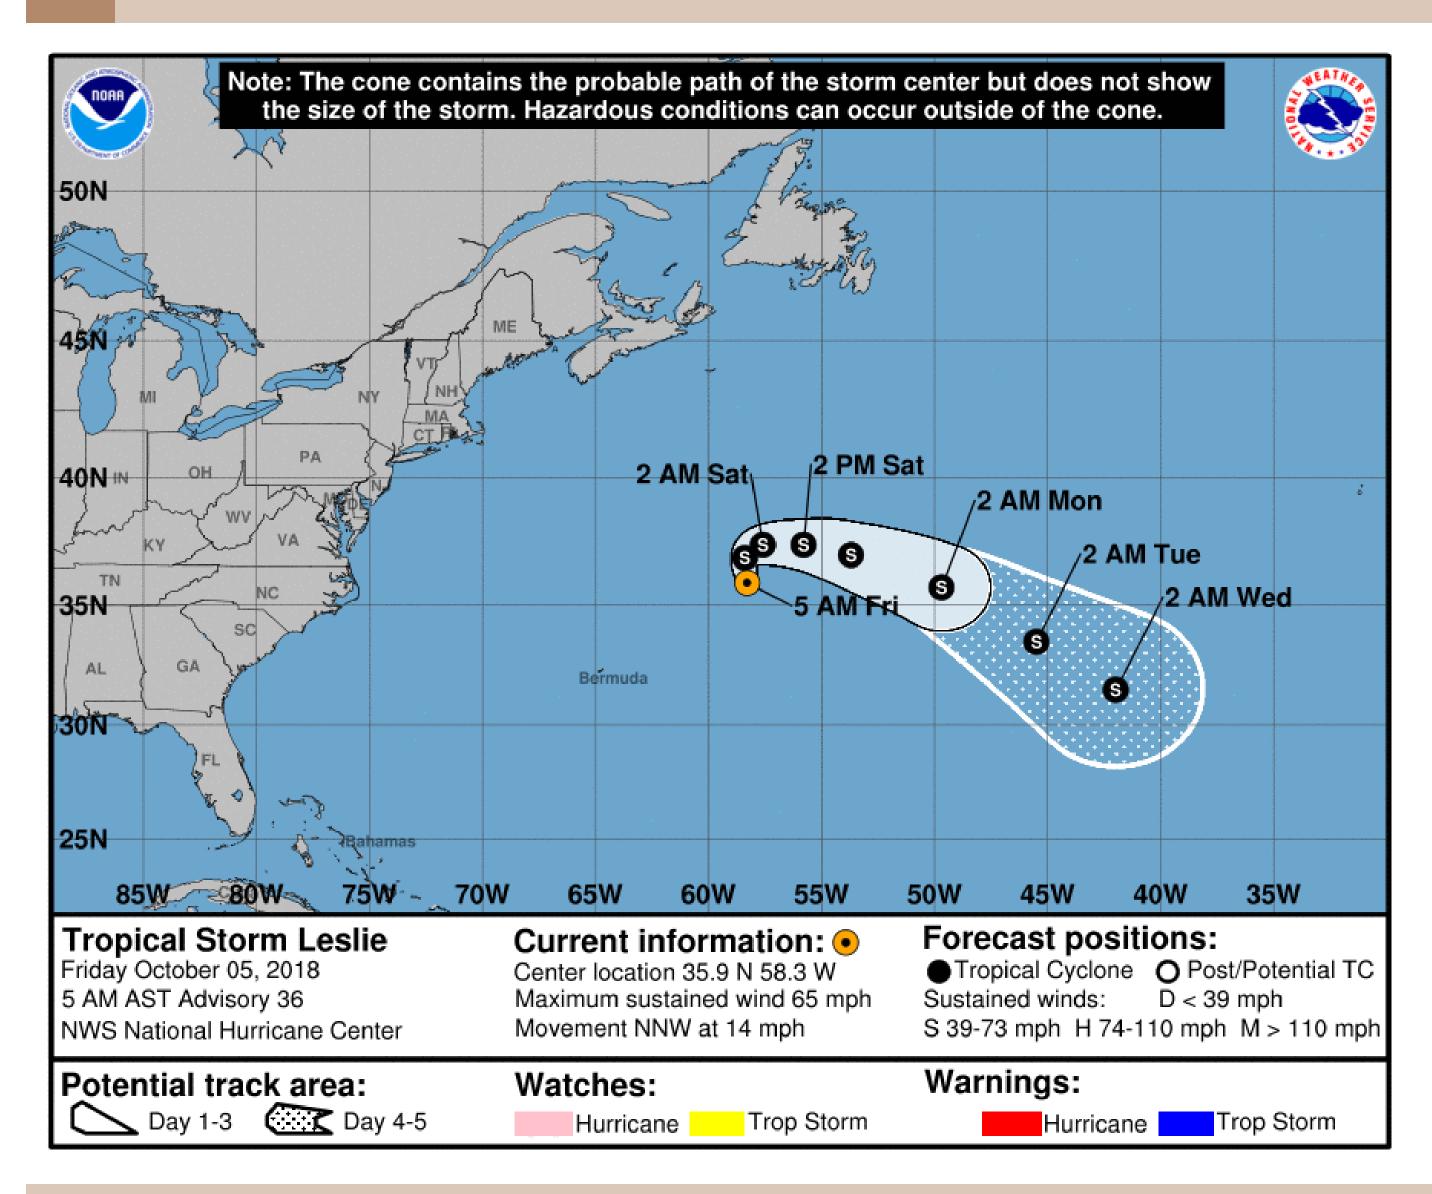

- Formation chance through 48 hours...low...near 30%
- Formation chance through 5 days...medium...60%

See next slide for forecast information on Hurricane Leslie.

Hurricane Leslie

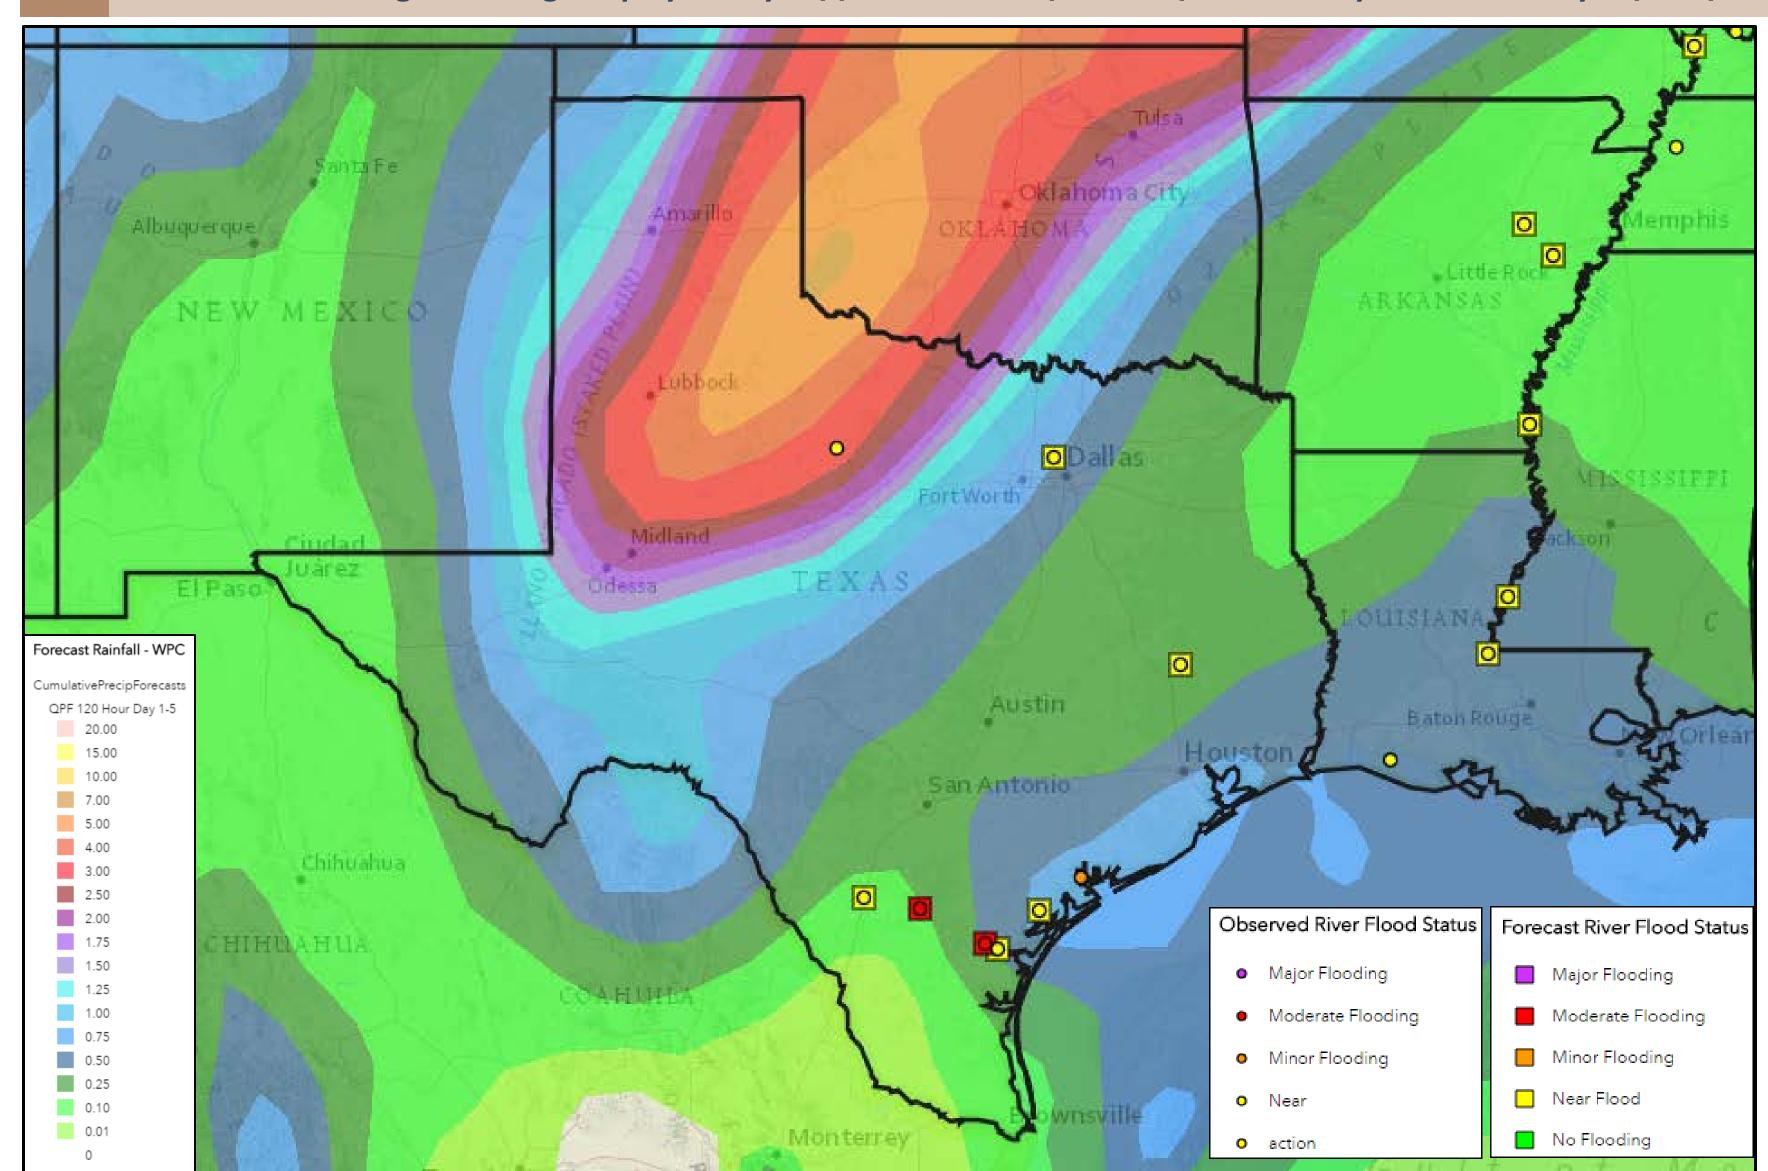

Hurricane Leslie is expected to meander over the Central Atlantic for much of this week.

No impacts to FEMA 6 are expected.

5-Day Precipitation Forecast & River Flood Status

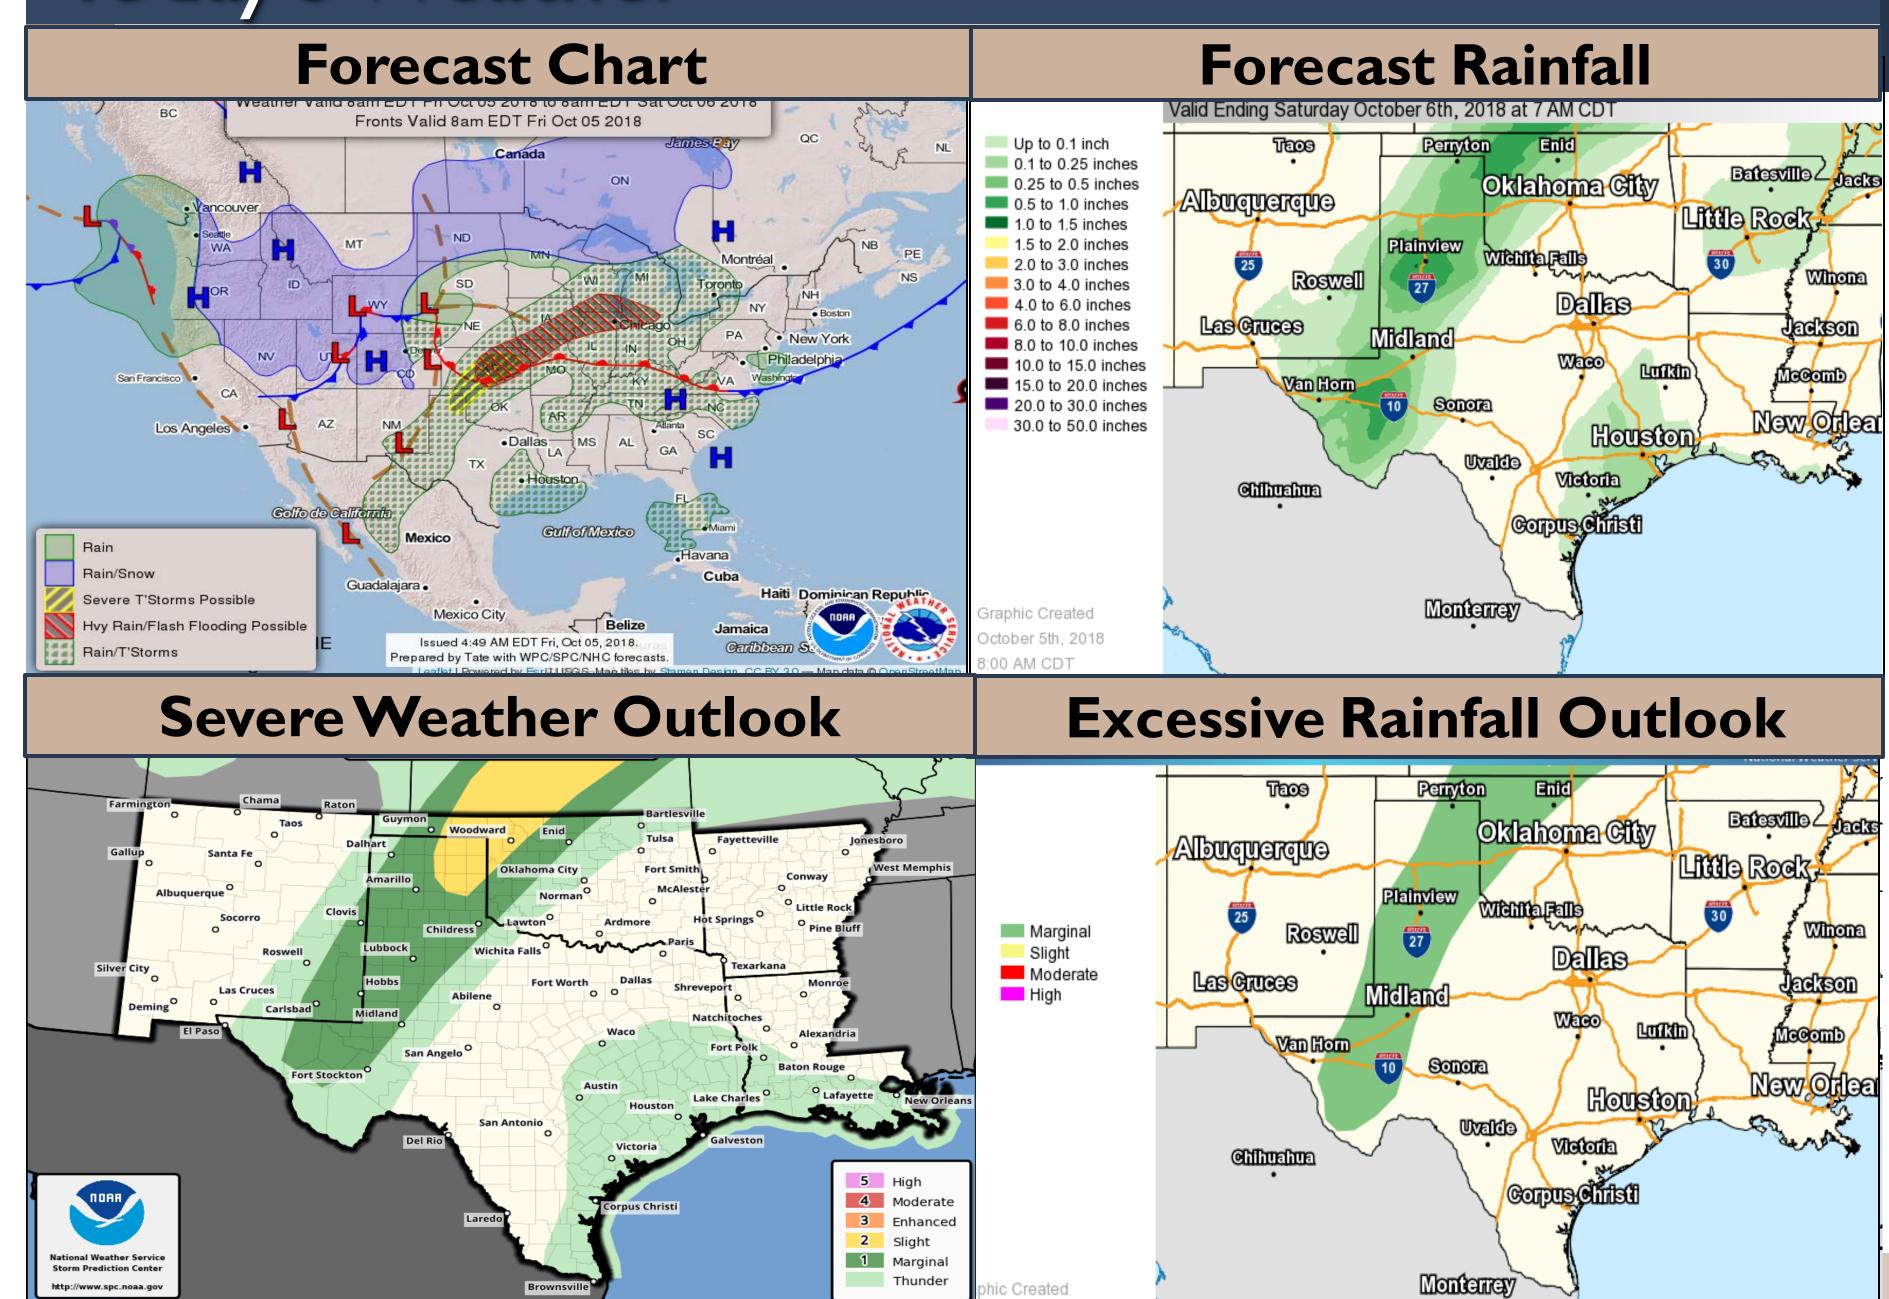

Note: Even though the image displays 5 days of forecasted rainfall, river forecasts only include 1-2 days of rainfall

Moderate river flooding continues on the Nueces river.

Today's Weather

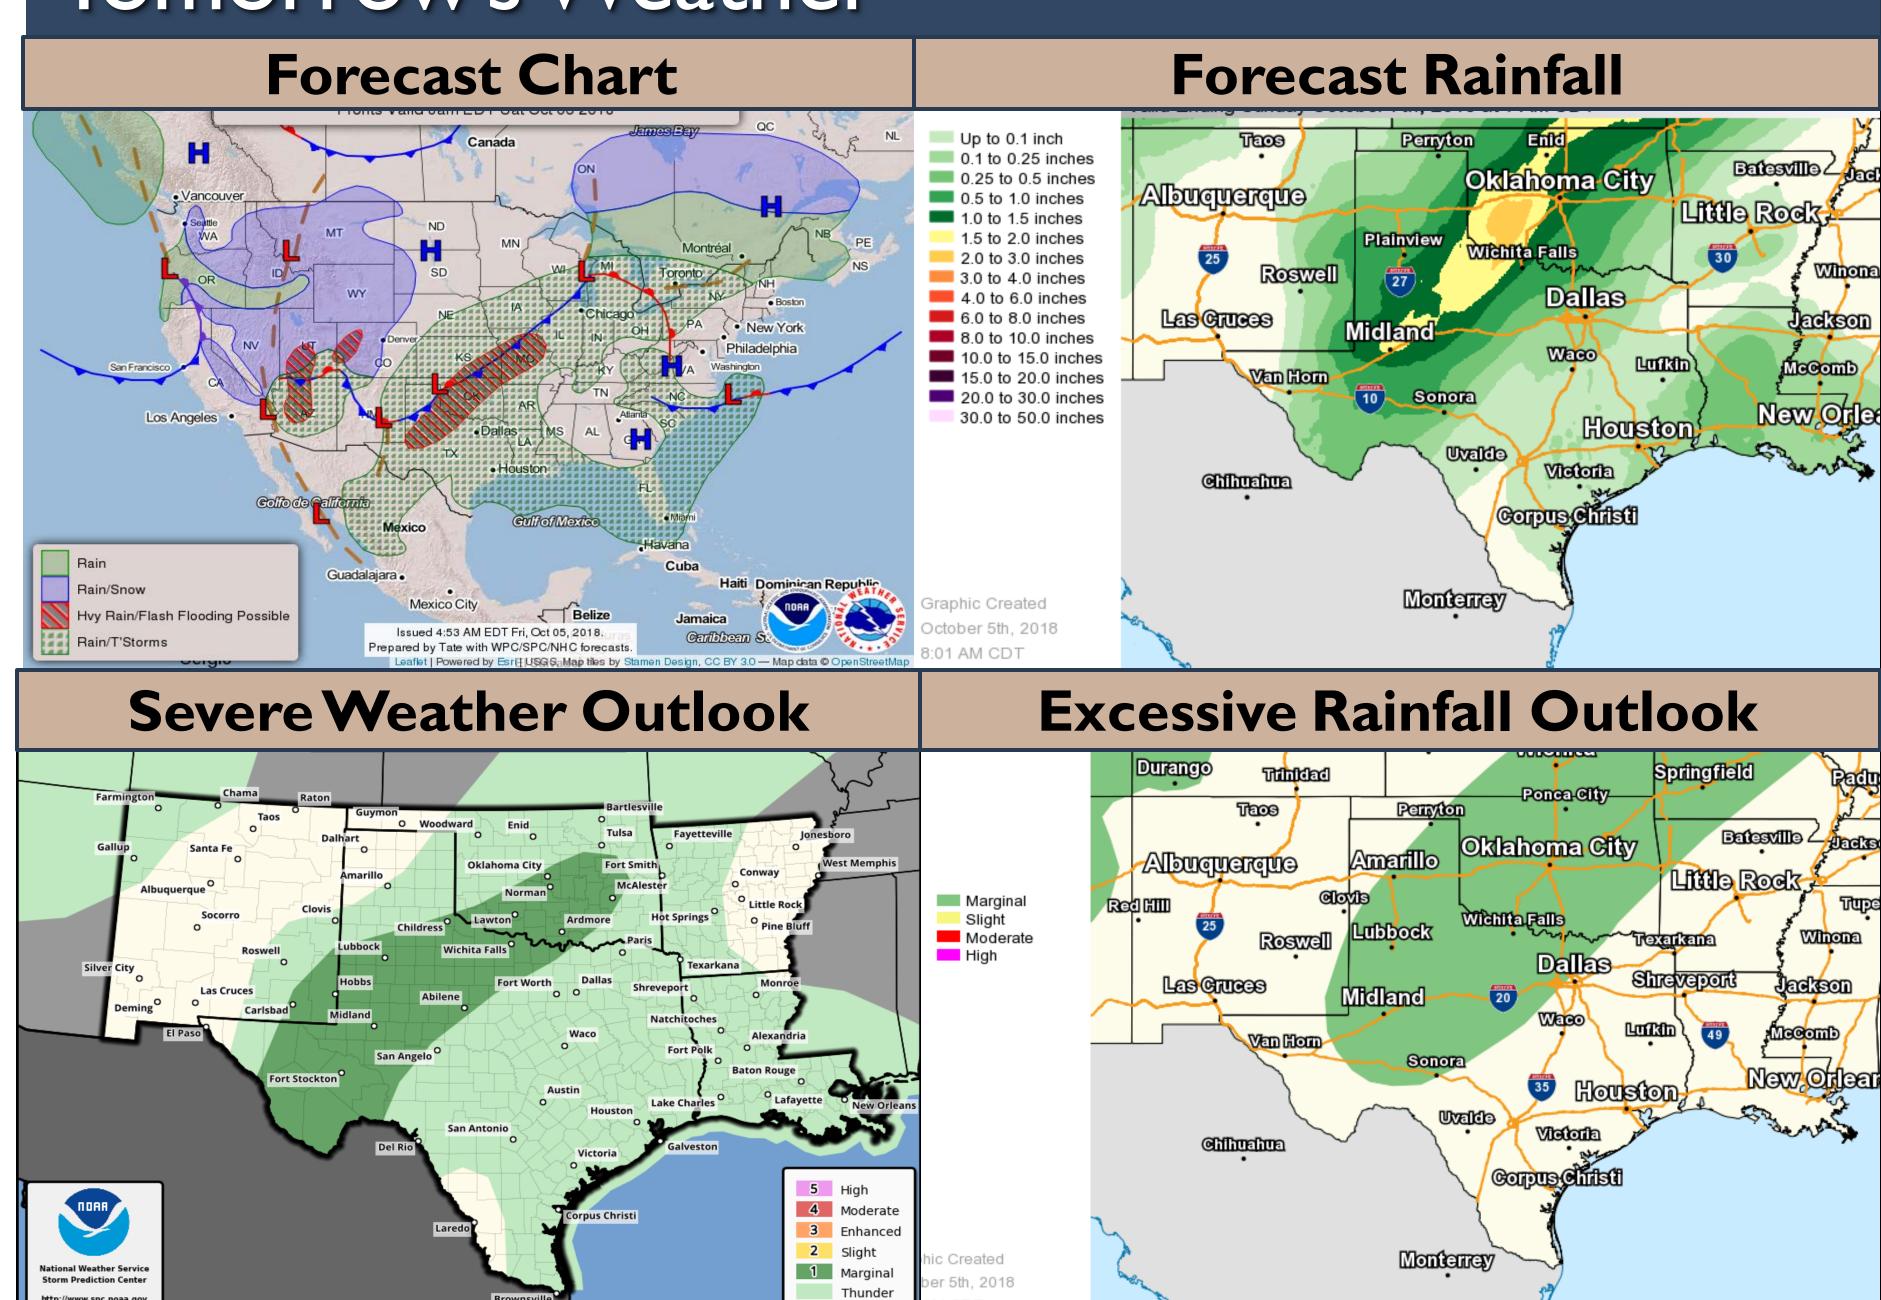

A few severe storms possible in W OK and the TX Panhandle.

Isolated heavy rain/flash flooding possible in the W OK and the TX Panhandle.

Tomorrow's Weather

M CDT

Isolated strong to severe storms possible in SW OK WTX/SE NM.

Areas of heavy rain/flash flooding possible OK and NTX.

Sunday's Weather

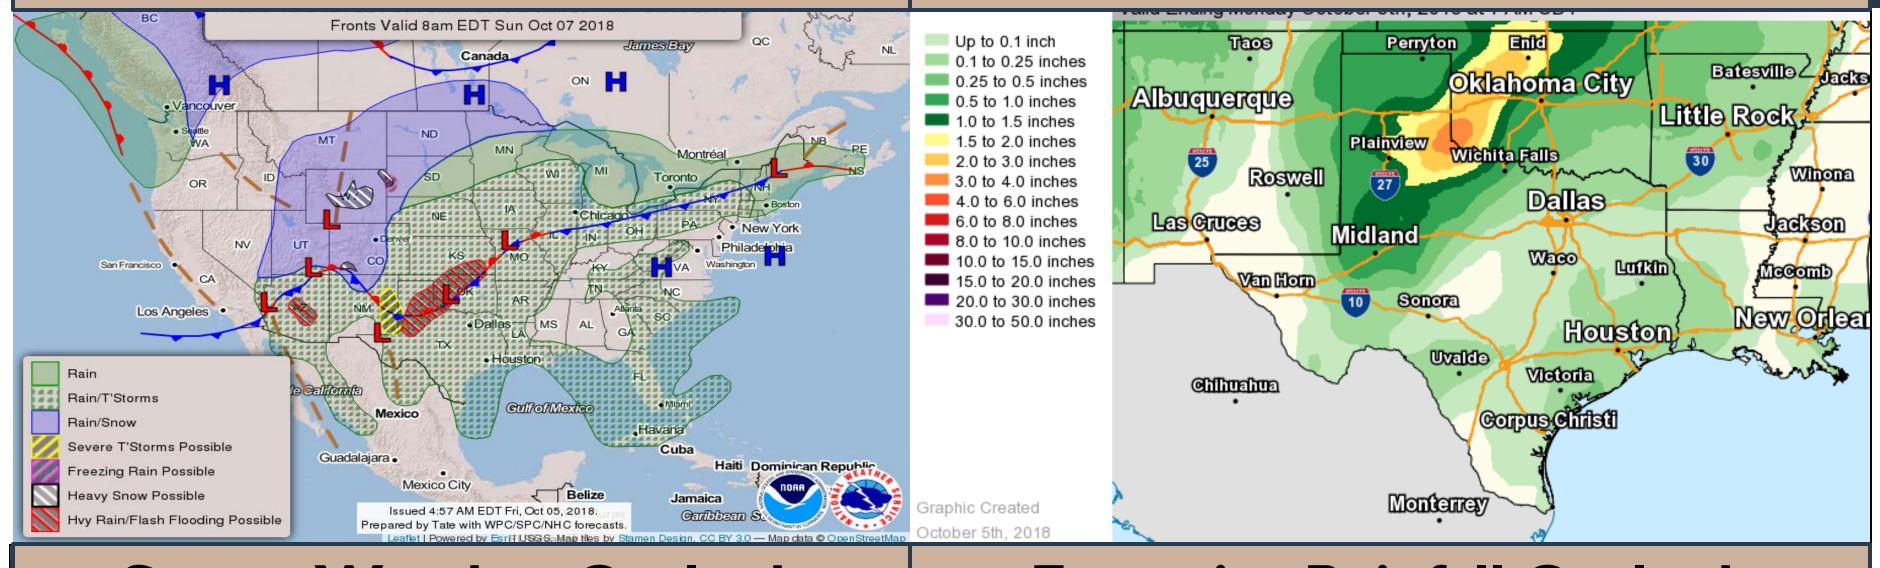

Forecast Chart

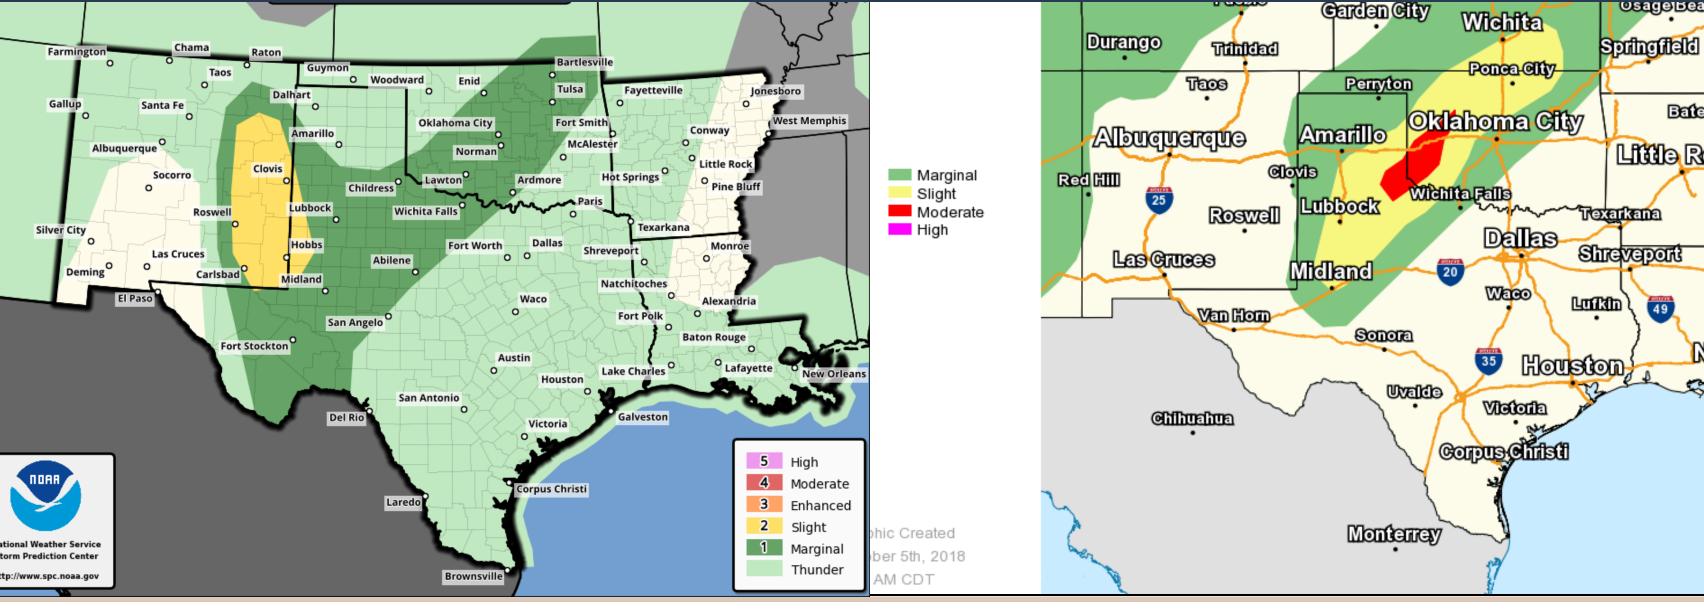

Areas of heavy rain/flash flooding possible for much of OK and portions of NWTX.

> A few strong to severe storms possible in E NM/WTX and OK

Severe Weather Outlook

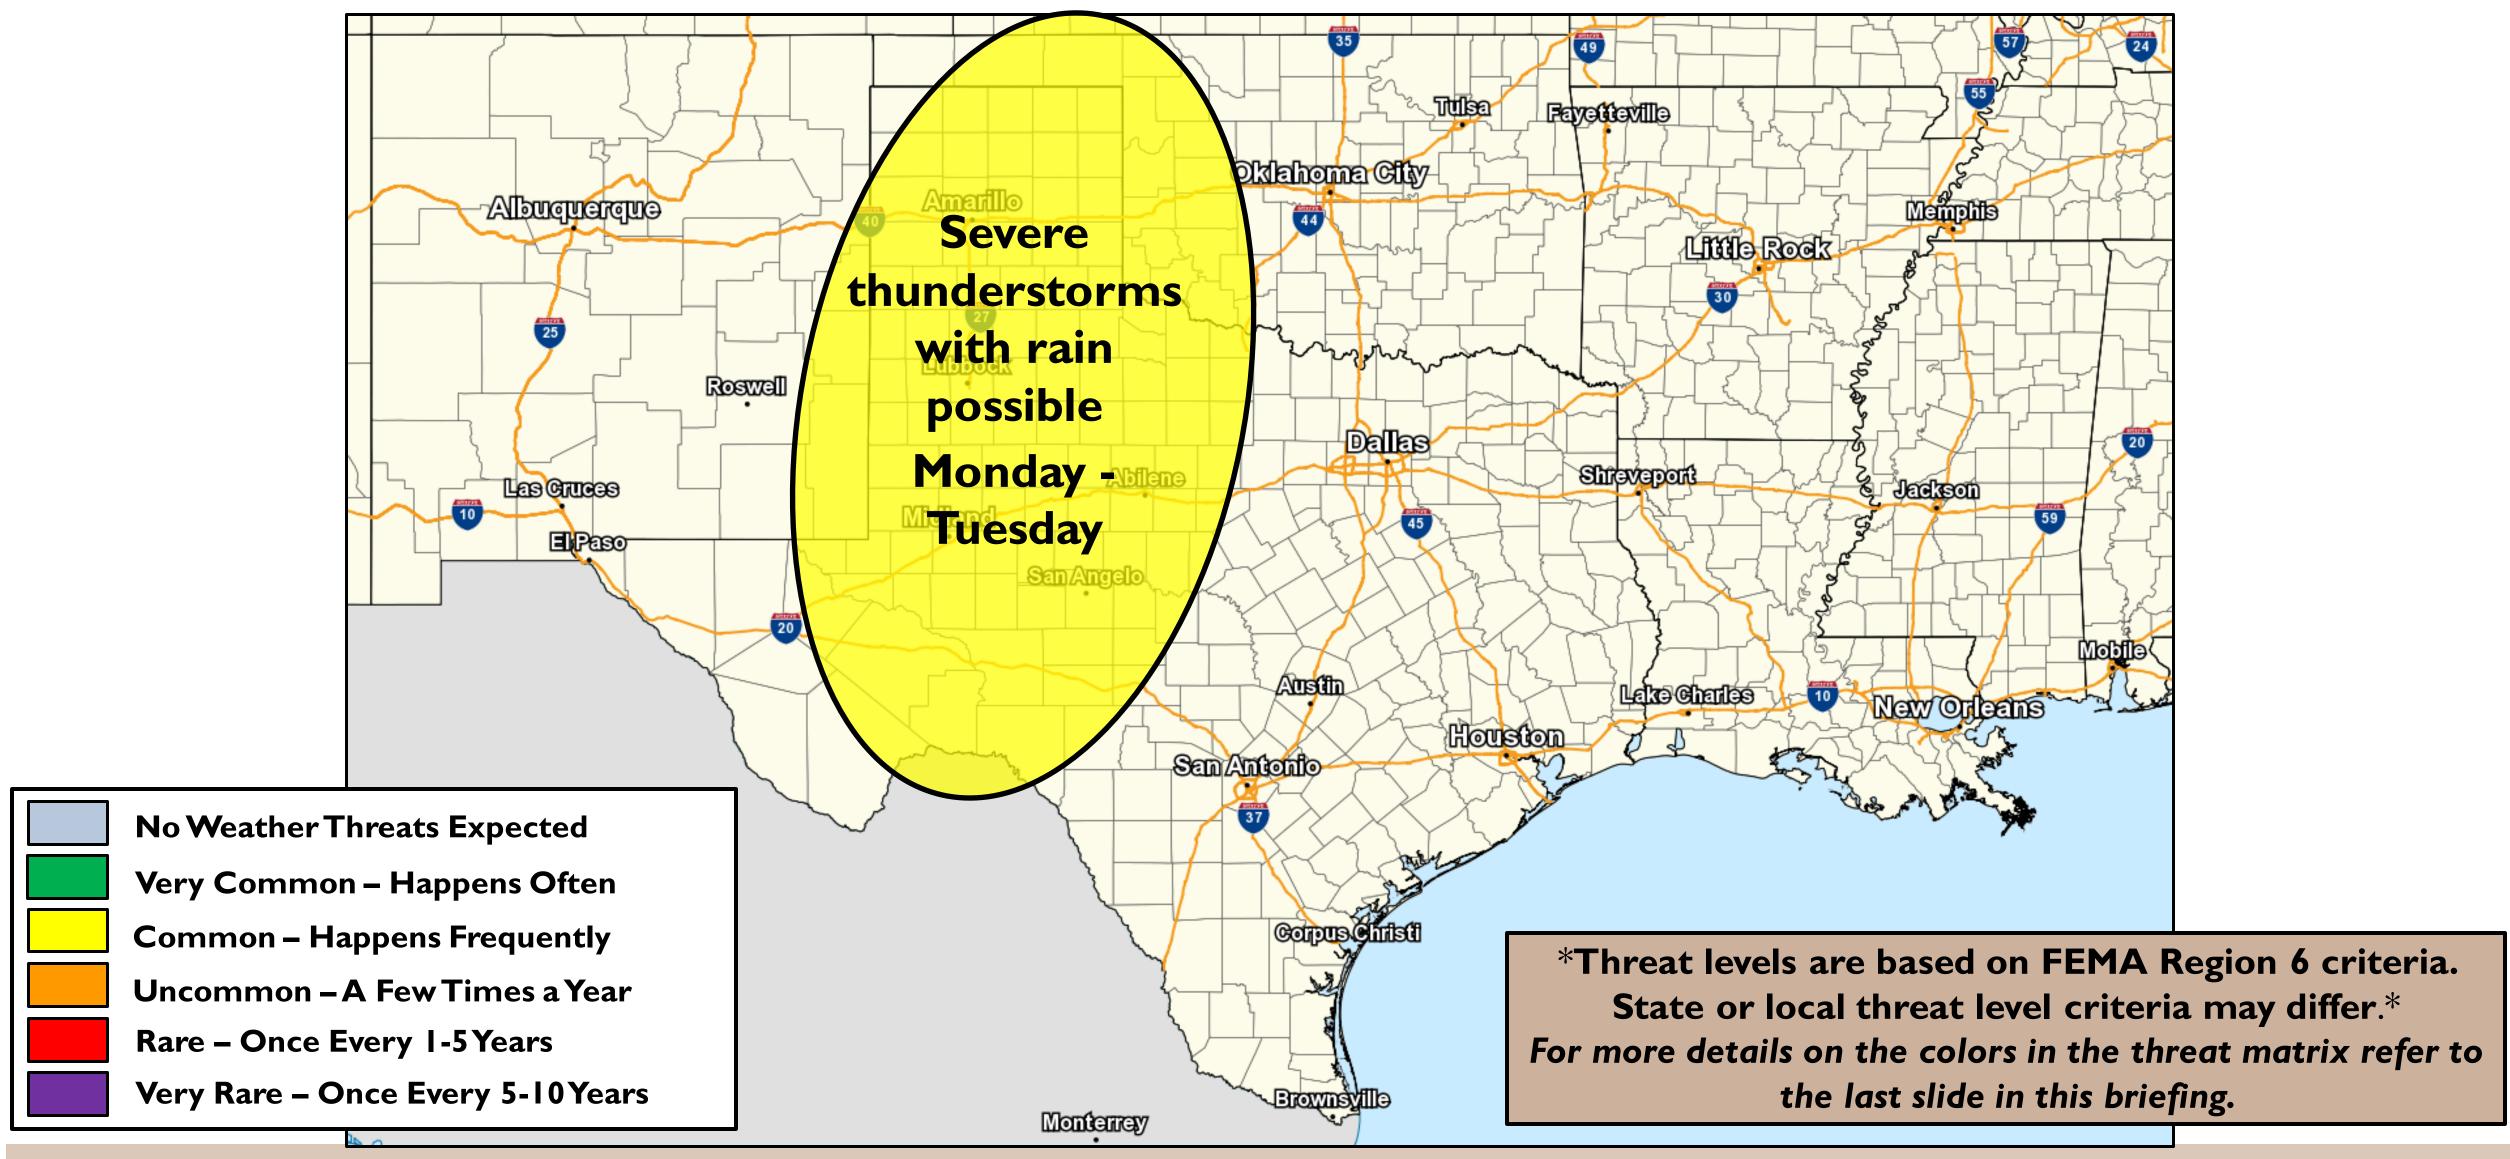

Excessive Rainfall Outlook

Days 4-5 Weather Hazards

Monday - Tuesday

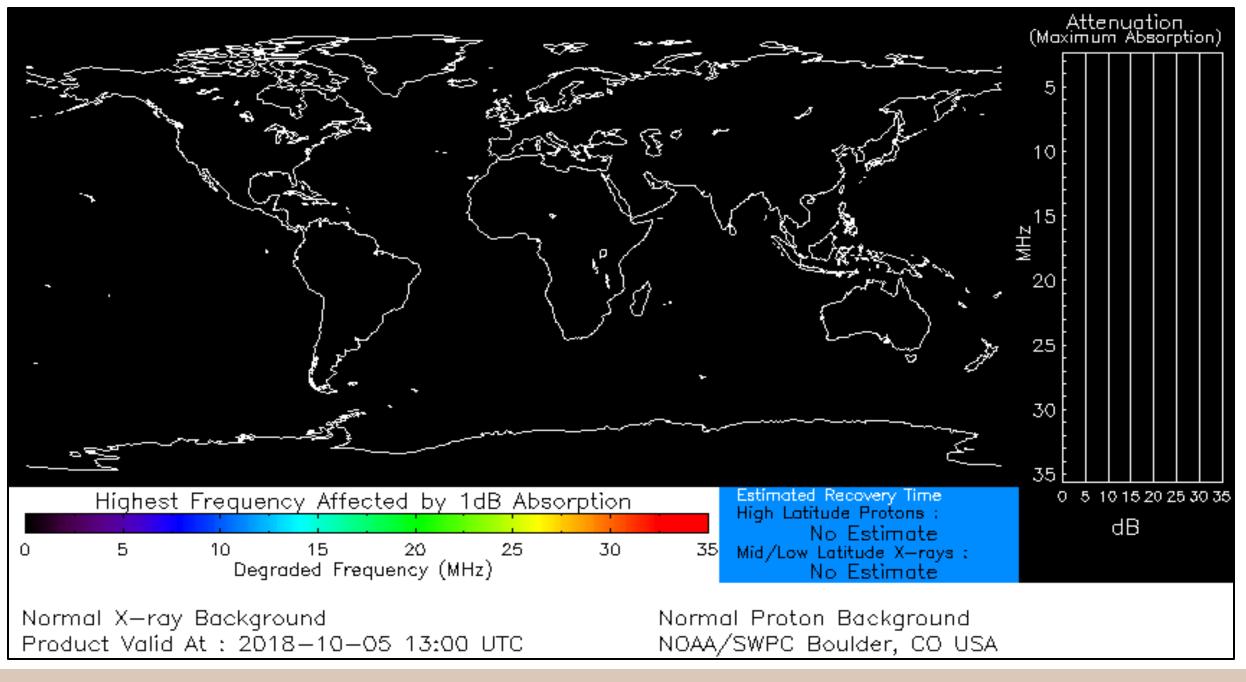

Space Weather 3-Day Forecast

	Friday	Saturday	Sunday
Geomagnetic Storms	Quiet (Max Kp = 2)	Quiet (Max Kp = 2)	Minor (GI) Storm (Max Kp = 5)
Solar Radiation Storm (SI-S5)	1%	1%	1%
Radio Blackout (RI-R2)	1%	1%	1%
Radio Blackout (R3-R5)	1%	1%	1%

	Weather "Threat" Matrix							
Color	Definition	Criteria	Example(s)					
Green	Very Common Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Little Inconvenience to Daily Routines	Severe: Marginal Risk from SPC Flooding: Minor flooding expected over localized areas Tropical: None Fire Weather: No Watches/Warnings, fuel moisture above 10% or green up active	 Thunderstorms expected over LA this afternoon; a few may produce winds to knock down a few trees Something that happens almost every day in a particular season such as seabreeze storms in coastal TX 					
Yellow	Somewhat Common — Happens Frequently Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Some Inconvenience to Daily Life	Severe: Slight Risk from SPC Flooding: Nuisance flooded expected for a widespread area, or Minor flooding expected over isolated areas Tropical: A weak tropical wave expected to move towards or near any coastline Fire Weather: Red Flag Watches/Warnings and/or SPC outlines enhanced or critical fire outlook	 2-3 inches of rainfall expected over central AR today and tonight; some minor (brief) street flooding possible Scattered severe storms possible, one or two tornadoes expected, along with reports of strong winds/wind damage and ~1" hail 					
Orange	Uncommon — A Few Times a Year Safety: Often Threatening to Life and Property, Some Damage Unavoidable Impact Potential: Typically Results in Minor Disruption to Daily Life	Severe: Enhanced Risk from SPC Flooding: Minor flooding expected over a widespread area (including urban locations), or Moderate flooding expected over isolated areas Tropical: A Tropical Storm expected to move towards or near any coastline Fire: Critical fire outlook for more than 2 consecutive days, Warnings for 2 or more consecutive days, D3-D4 drought conditions	 A snow/sleet mix is expected to move through or near the DFW area tomorrow morning; travel impacts likely Numerous severe storms possible, a few tornadoes possible along with several reports of wind damage along with damaging hail Some large fires reported, burn bans advertised, critical conditions expected 					
Red	Rare — Once every 1-5 Years Safety: Extensive Property Damage Likely, Life Saving Actions Also will be Needed Impact Potential: Will likely result in Large Disruption to Daily Life	Severe: Moderate Risk from SPC Flooding: Moderate flooding expected over a widespread area (including urban locations) Tropical: A Hurricane expected to move towards or near any coastline Fire: Large areas of critical conditions for 2 or more days, Warnings for 3 or more days, Severe to extreme drought	 A Category 1 hurricane will be moving towards the NW Gulf in the next few days Widespread severe storms likely, strong tornadoes, widespread wind damage, and destructive hail Large fires ongoing throughout the area with critical fire weather conditions expected to continue 					
Purple	Very Rare — Once Every 5-10 Years Safety: Property Damage Unavoidable, Immediate Action to Save Life will be Needed Impact Potential: Typically Results in Long-Lived Widespread Major Disruption to Daily Life	Severe: High Risk from SPC Flooding: Major flooding expected over a widespread area (including urban locations) Tropical: A Major Hurricane (Cat3 or greater) expected to move towards or near any coastline Fire: Large area of critical conditions for 2 or more days, Warnings for 3 or more days, Long term (months) of severe to extreme drought	 A Category 4 hurricane is headed towards the SE LA; major storm surge, flooding and damaging winds anticipated to begin tomorrow Widespread severe storms expected, tornado outbreak probable with long- lived, very widespread and particularly intense storms 					

Criteria for the color codes in this briefing is to the left, please provide any feedback to

sr-srh.roc@noaa.gov.
